Is your pet on any supplements or medication? Please list all below.

**Pre-Anesthetic Blood Testing:** Our greatest concern is the well being of your pet. We will be using pulse Oximetry/ECG/BP/temperature to monitor your pet during surgery. This technology along with pre-anesthetic blood screening reduces many of the risks of surgery. Before putting your pet under anesthesia, we will perform pre-anesthetic blood work. Many conditions including disorders of the liver, kidneys and blood may not be detected unless blood testing is performed. For these reasons, the complete blood work is part of your surgery/anesthesia package. If any abnormalities are detected in the blood work the procedure will be postponed and you will only be charged for the blood work. The total costs of these tests are: \$ 150.00
